

CALEB AJIBADE

Mobile and Fullstack Engineer

PROFILE

I'm a Fullstack engineer passionate about creating efficient, user-friendly, and innovative software solutions. With a solid foundation in programming and backend development, I specialize in using TypeScript for writing robust, maintainable code and leveraging Firebase to manage data and backend operations seamlessly.

WORK EXPERIENCE

Intern

Aug 2024 - Nov 2024

Colab Innovation Hub

- Working with the fullstack development team.
- Learnt frameworks and technologies for Fullstack like node, react and, tailwind

PROJECTS

Flutter: Comic veiwing app

Github: <https://github.com/Zeaforx/manga-reader>

- Utilizes webscraping from a free comic site.
- Multilevel routing and string manipulation

NextJS: Clothing Store

Github: <https://github.com/Zeaforx/manga-reader>
live link: <https://webshop1-p2jb.vercel.app/>

- Uses Firebase on the backend to fetch products and store shipping details.
- Uses typescript for safer and more static code.

Flutter: todo app

Github: <https://github.com/Zeaforx/todo-flutter>

- Uses state to manage todos
- Tasks can be created and deleted
- Users can assign priority to todo
